

# Desktop-as-a-Service (DaaS)

The future of business solutions

Desktop deployment and management, all in the cloud

## Increase Productivity.

To stay ahead in today's business world, your employees need secure access anywhere in the world, on any device. Time, place, or device is no longer a limitation with CCSi's DaaS.

## Secured, Fully Encrypted Data. (AES 256bit)

All malware, anti-virus, and security included and updated to maintain protection at all times.

## Overall Cost-Savings.

PCs, hardware, equipment, storage, memory and IT services all included. Easily scale your desktops as business requires.

## Microsoft Office Suite Included.

You'll find even more savings with the inclusion of Windows operating system and Microsoft Office Suite. No need to budget for software upgrades - with CCSi's DaaS, software versions are automatically updated.

## Seamless Deployment.

New employees? No problem. CCSi will have new users up in minutes with all applications running - saving IT, operations and administration departments valuable time.

Workplaces today are changing at such a rate that many organizations are struggling to keep up. With continuous evolution comes opportunities, but also challenges to purchase and implement technology on your own. DaaS helps reduce expenses, while providing you with the most up to date programs and resources so your business doesn't fall behind.
